THE ASTRONOMICAL JOURNAL

FOUNDED BY B. A. GOULD

PUBLISHED FOR THE AMERICAN ASTRONOMICAL SOCIETY
BY THE AMERICAN INSTITUTE OF PHYSICS INC.

Editors

DIRK BROUWER HARLAN J. SMITH

Assistant Editor

MARY S. ALBEE

Associate Editors

G. M. CLEMENCE
Director of the Gould Fund
U. S. Naval Observatory

BERNARD F. BURKE
Carnegie Institution of Washington

WM. MARKOWITZ
U. S. Naval Observatory

JOHN A. O'KEEFE
NASA, Goddard Space Flight Center

VOLUME 67

1962

NUMBERS 1296–1305

Editorial Office: Yale University Observatory, New Haven 11, Connecticut

Publications Office: American Institute of Physics Inc., New York 17, New York

CONTENTS

NUMBER 1296

On the distribution of semimajor axes among comet orbits, by Fred L. Whipple 1
A nonsingular set of orbit elements, by C. J. Cohen and E. C. Hubbard 10
On the variation of arbitrary vectorial constants, by Paul Herget 16
The use of Lambert's theorem in orbit determination, by P. Sconzo 19
A modified form of the LaPlace coefficients, by John D. Mulholland 22
A study of selected regions in the Scutum Cloud by means of infrared stellar spectra, by Henry Albers 24
The space distribution of late-type stars in a north galactic pole region, by A. R. Upgren, Jr. 37
The galactic distribution of the Wolf-Rayet stars, by Morton S. Roberts 79
The light variation and orbital elements of ER Orionis, by L. Binnendijk 86
FURTHER REPORTS OF OBSERVATORIES
David Dunlap 96
Kitt Peak 97
Lockheed Solar 103
NOTES AND OBSERVATIONS
Addendum to "Some remarks on the motion of a satellite of an oblate planet," by Richard B. Barrar 105
Variation of latitude at La Plata, 1957.5–1959.0, by A. Cabrera, O. Caceres, and A. Korsun 106
Recommendations on notation of the earth potential, by Y. Hagihara 108

NUMBER 1297

Abstracts of papers presented at the 109th meeting of the American Astronomical Society 109
Distribution of stars in the Leo II Dwarf Galaxy, by Paul W. Hodge 125
A three-color photoelectric investigation of δ Librae, by Robert H. Koch 130
Micrometer measures of double stars, by W. H. van den Bos 141
The color of the moon, by Sidney van den Bergh 147
NOTICES
Changes in Graduate Level Research Facilities Program 151
Summer Institute in Dynamical Astronomy 151
NEW BOOKS RECEIVED 152

NUMBER 1298

Constitution of the American Astronomical Society 153
Meteor trail widths, by Allan F. Cook, Gerald S. Hawkins, and Francis M. Stienon 158
Some properties of rosette configurations of gravitating bodies in homographic equilibrium, by W. B. Klemperer 162
Hydrogen content of Jupiter's atmosphere, by F. R. Zabriskie 168
Observations of sixty discrete sources at 1423 Mc, by Samuel J. Goldstein, Jr. 171
Numerical comparison between Brouwer's theory and solution by Cowell's method for the orbit of an artificial satellite, by R. H. Lyddane and C. J. Cohen 176
Summary of the parallaxes of ninety-one stars from plates obtained with the Yale 26-inch telescope, by Louise F. Jenkins 178
NOTES AND OBSERVATIONS
A note on the gas tails of comets, by John C. Brandt 180

NUMBER 1299

A radar investigation of Venus, by G. H. Pettingill, H. W. Briscoe, J. V. Evans, E. Gehrels, G. M. Hyde, L. G. Kraft, R. Price, and W. B. Smith 181
The astronomical unit determined by radar reflections from Venus, by D. O. Muhleman, D. B. Holdridge, and N. Block 191
Uniformly valid asymptotic representation for all times of the motion of a satellite in the vicinity of the smaller body in the restricted three-body problem, by J. Kevorkian 204
Motion of a satellite around an oblate earth, by H. Poritsky 212
Neutral hydrogen in M33, by Nannielou H. Dieter 217
A search for *H*I in Centaurus A, by Nannielou H. Dieter 222
Interstellar absorption in the galactic neighborhood of the sun, by J. D. Fernie 224
Twelve variable stars in Sagittarius, by Dorrit Hoffleit 228
NEW BOOKS RECEIVED 232

NUMBER 1300

SYMPOSIUM: Small meteoric particles in the earth's neighborhood ... 233
Introduction, by D. W. R. McKinley ... 233
The meteor radar echo—an observational survey, by Peter M. Millman ... 235
Radar determination of meteor orbits, by Gerald S. Hawkins ... 241
Radar studies of 15th-magnitude meteors, by V. R. Eshleman and P. B. Gallagher ... 245
Measurements of distribution of interplanetary dust, by Maurice Dubin and Curtis W. McCracken ... 248
Studies of micrometeorites obtained from a recoverable sounding rocket, by C. L. Hemenway and R. K. Soberman ... 256
ABSTRACTS of papers presented at the 110th meeting of the American Astronomical Society ... 267
Integration of the equations of planetary motion in rectangular coordinates, by J. M. A. Danby ... 287
Development of the lunar and solar disturbing functions for a close satellite, by William M. Kaula ... 300
Preliminary study of orbits of interest for moon probes, by Su-Shu Huang ... 304
Mean values of cosine functions in elliptic motion, by Yoshihide Kozai ... 311
Neutral hydrogen in IC 342, by Nannielou H. Dieter ... 313
Neutral hydrogen in M101, by Nannielou H. Dieter ... 317
Venusian and lunar radar depolarization experiments, by Gerald S. Levy and Danver Schuster ... 320
NEW BOOKS RECEIVED ... 327
NOTICE
U.S. and U.S.S.R. Academy of Sciences Research Scientist Agreement ... 328

NUMBER 1301

Stellar content of the galaxy's nuclear bulge, by George Wallerstein ... 329
223 variables in the Andromeda Nebula, by Sergei Gaposchkin ... 334
An eclipsing variable in the Andromeda Nebula (M31), by Sergei Gaposchkin ... 358
Heavy eclipsing system at high latitude, by Sergei Gaposchkin ... 360
Redshifts of 92 galaxies, by Nicholas U. Mayall and Antoinette de Vaucouleurs ... 363
The distribution of extragalactic nebulae: The zone of avoidance, by Uli W. Steinlin ... 370
Parallax of the moon in terms of a world geodetic system, by Irene Fischer ... 373
Planetary distances according to general relativity, by G. M. Clemence ... 379
Additional periodic trojan orbits and further studies of their stability features, by Eugene Rabe ... 382
Determination of mean elements for Brouwer's satellite theory, by Barbara J. Cain ... 391
Eclipsing binary extinction errors, by Albert P. Linnell ... 393
A visual survey of M-dwarf stars for duplicity, by Charles E. Worley ... 396
Measures of 278 double stars, by Charles E. Worley ... 403
Comet observations, by G. Van Biesbroeck ... 422
NEW BOOKS RECEIVED ... 429
ANNOUNCEMENT
Lunar and Planetary Laboratory Publication ... 430

NUMBER 1302

A study of neutral hydrogen in IC 10, by Morton S. Roberts ... 431
The neutral hydrogen content of late-type spiral galaxies, by Morton S. Roberts ... 437
Second-order solution of artificial satellite theory without air drag, by Yoshihide Kozai ... 446
Light elements of some eclipsing binaries, by Joanne C. Koch and Robert H. Koch ... 462
On the flexure of fork-mounted telescopes, by S. Vasilevskis ... 464

NUMBER 1303

The structure of star clusters. I. An empirical density law, by Ivan King ... 471
The frequency of stars with different metal abundances, by Sidney van den Bergh ... 486
Kinematic studies of early stars. I. Photometric survey, space motions, and comparison with radio observations, by Vera C. Rubin 491
Relative positions and proper motions in the region of M37, by William H. Jeffreys, III ... 532
Parallax and orbital motion of the triple system 26 Draconis from photographs taken with the Sproul 24-inch refractor, by A. R. Upgren ... 539
Parallax and orbital motion of the multiple system ADS 48 A, B, F, from photographs taken with the Sproul 24-inch refractor, by Jon K. Wooley ... 544
Proper motions of six wide double stars from photographs taken with the Sproul 24-inch refractor, by Peter van de Kamp and W. Butler Burton ... 549
Parallax and proper motion of Wachmann's flare star from photographs taken with the Sproul 24-inch refractor, by Peter van de Kamp ... 551
Orbits of three visual binaries, by W. H. van den Bos ... 552
Micrometer Measures of Double Stars. II, by W. H. van den Bos ... 555
NOTICES
Foreign Visiting Professorships of the American Astronomical Society ... 568
NSF Graduate-Level Research Facilities Program ... 569
NEW BOOKS RECEIVED ... 569
ERRATA ... 570

M502H
5

NUMBER 1304

ABSTRACTS of papers presented at the 111th meeting of the American Astronomical Society 571
Secular perturbations of asteroids with high inclination and eccentricity, by Yoshihide Kozai 591
Automatic orbit computation for visual binaries, by Roland Wielen 599
REPORTS OF OBSERVATORIES 608

NUMBER 1305

SYMPOSIUM: Astrometry 685
Systematic errors in the AGK2 and final reductions in the AGK3 program, by W. Dieckvoss 686
Status of the International Reference Star Programs, by Francis P. Scott 690
Current work on Southern Zone Catalogues at the Yale Observatory, by Dorrit Hoffleit 696
On proper motions of open clusters, by S. Vasilevskis 699
Astrometry with large reflectors, by K. Aa. Strand 706
The steady-state space distribution of meteoric particles under the operation of the Poynting-Robertson Effect, by Robert E. Briggs 710
Investigation of variations in the decimeter-wave emission from Jupiter, by E. F. McClain, J. H. Nichols, and J. A. Waak 724
Measurements of the decimeter radiation from Jupiter, by A. C. Miller and B. L. Gary 727
Periodic librations about the triangular solutions of the restricted earth–moon problem and their orbital stabilities, by Eugene Rabe and Allan Schanzle 732
Mean absolute magnitude of the blue stars at high galactic latitude, by Arnold R. Klemola 740
The relationship between *CN* Anomaly and *U*, *V*, and *W* components of space motion, by Kenneth M. Yoss 757
The distance to the galactic center from globular clusters, by J. D. Fernie 769
FURTHER REPORTS OF OBSERVATORIES
Flower and Cook 775
National Radio Astronomy 777
Rochester 780
Sacramento Peak 781
Stanford 786
Yerkes and McDonald 788
NEW BOOKS RECEIVED 795
AUTHOR INDEX to the sixty-seventh volume 796
SUBJECT INDEX to the sixty-seventh volume 804
